

Finnair Environmental and Energy Efficiency policy

Finnair flies between Asia, Europe and North America with an emphasis on short connections via Helsinki. Finnair's extensive network connects multiple cities in Asia and North America with over 100 destinations in Europe. Finnair strives to be among the leading airlines in the sustainable development of the aviation sector.

Responsible, transparent and effective environmental management is integral to Finnair's business agenda and leadership model. The Group implements standardized environmental management practices and strives to apply the best practices in the aviation sector. Finnair Group's environmental management system follows the principles of continuous improvement.

Finnair is committed to complying with environmental and energy regulation, legislation and other applicable obligations while also anticipating developments in these fields.

Finnair acknowledges, continuously assess and responds to its environmental aspects and impacts. Clearly defined objectives are set within Finnair Group's operational management system to improve its environmental performance and energy efficiency. The company monitors, audits and reviews its performance as well as collects and analyses data systematically on its impacts to the environment.

Finnair is committed to protect the natural environment, minimise the use of energy, and strives to minimise release of waste and harmful substances to the environment. Finnair shall enforce pollution prevention hierarchy in its functions; prevent, reduce, reuse, control.

Finnair Group is committed to the airline industry's common goal of carbon neutral growth from 2020 onwards, and to halve the industry's carbon emissions by 2050 compared to the 2005 level.

With our stakeholders, we conduct an active and open reciprocal dialogue about the effects of our activities, environmental and energy efficiency related issues, targets and results.

Together with personnel, key stakeholders and other partners, the Group proactively surveys the environmental concerns and viewpoints.

Together with its partners, Finnair Group explores possibilities for the sustainable deployment of renewable energy.

Finnair also requires responsible environmental management practices from its essential business partners.

This general policy shall apply to all unit, function and subsidiary levels at Finnair. Finnair environment management system scope includes flight operations, energy consumption of corporate facilities, and catering services.

Finnair's Executive Board is strongly committed to executing this policy and to providing the necessary competent resources for its implementation.

Topi Manner

CEO, Finnair Ltd.
